Plant Observation Sheet

Look around and you will see a lot of different plant types. When you see a plant or flower in its natural habitat (not one bought and re-planted from a greenhouse), write down the observations you make about it. Fill out the Plant Observation Sheet. Use a field guide to research the plant and write at least three facts about the plant. Include a drawing of the plant and label the different parts of the plant.
Plant Observation Sheet

Date/Season:_______________________________________________

Plant Name:_______________________________________________

Location:__________________________________________________

Are there animals that use this plant—as a home, for food, for shelter?
